

## Environmental Policy

Airolit AB creates a long term sustainable business model by analyzing environmental aspects with the aim to lower our environmental impact. All employees shall agree to and respect the company's environmental commitment and participate in achieving Airolit's environmental targets based on the identified aspects.

Efforts will focus on reducing emissions and waste in our supply chain and to optimize transportation to minimize our carbon footprint. Our efforts shall be informed to our suppliers and partners with a requirement for them to address their environmental aspects.

We shall educate our staff on environmental issues and sustainable practices, perform regular monitoring of environmental targets and drive continuous improvements therein. We shall maintain transparency and communicate our environmental efforts to stakeholders.

We will adhere to all applicable environmental laws and regulations, striving to exceed them when possible.
