

## Quality Policy

Airolit AB and all its employees are always striving to create customer value by developing high quality and reliable UAS solutions. We have a commitment to deliver world class/state of the art UAV's and associated equipment as well as being an expert partner to companies and organizations acting in advanced fields.

We shall create value for our customers through:

- Quality
- Expertise
- High level of customer service and trust

To become successful in this endeavour, we shall have committed leadership, customer focus in all processes as well as involvement of all employees to have a risk managed and fact based approach to our daily activities. Further, we shall have good knowledge and comply with applicable laws and requirements.
